***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Goss (U.S. 5933094).

Goss teaches (figure 2) a radio receiver for digitally coded traffic information includes traffic messages having a standard format having a header and a additional information portion, having location information, comprising: a receiving stage (12) comprising means for separating digital data from speech information, analyzing means (14) for decoding digital data input from receiving stage to obtain decoded traffic messages and processor connected to analyzer to receive decoded traffic messages including means for processing the message.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goss

As mentioned above, Goss teaches all of the limitations of claim 1.

Goss does not teach dividing the additional information into classes having class indicators and length. However this is well known in the art and would have been obvious to one of ordinary skill in the art to adapt to Goss' system as a matter of design choice.

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weishaupt (U.S. 5987382), Berninger (U.S. 5355526), Duckeck (U.S. 5493709), Wendel (U.S. 5655561) and Sutsos (U.S. 5903216) are cited to show the state of the art.
